

HISTORIC MIRAMAR INFRASTRUCTURE IMPROVEMENTS PROJECT (HMII3) Weekly Newsletter Update

May 4, 2020 Vol. 47

The HMII3 Project Team manages the Historic Miramar Infrastructure Improvements Project, Phase 3 (HMII3). The intent of this project is to update the 1950's era water mains, construct new storm drains and swales, and enhance fire protection with additional fire hydrants. It will also provide sanitary sewer services that will allow property owners to abandon their septic tanks once connected to the new sewer system. This project is aimed at improving stormwater drainage in your neighborhood.

As the HMII3 project nears completion, Reynolds Construction continues to remain focused on the restoration of driveways and swales between SW 66th Avenue and SW 64th Avenue.

Reynolds Construction will continue to restore the swales on the west side of SW 64th Avenue between Pembroke Road and SW 25th Street. If you have personal property such as small trees, shrubs or plants in the swale between Pembroke Road and SW 25th Street, you should remove these plantings until the contractor has completed the restoration. Reynolds Construction is not responsible for replacing these trees, shrubs or plants. Please do not park in the swale on the west side of SW 64th Avenue.

Reynolds Construction will continue with the restoration of swales between SW 66th Avenue and SW 64th Avenue on SW 18th and SW 19th Streets. Once the swales are restored, sod will be installed. Please do not park on swales or curbsides on the north or south side of these streets.

The contractor has scheduled the restoration of stamped concrete driveways on SW 21st Street between SW 64th Avenue and SW 66th Avenue beginning May 4, 2020. Please do not park on the driveway or in the right of way.

Thank you for your continued patience and understanding as Reynolds Construction and the HMII3 Team continue to address your restoration concerns in the HMII3 project area. If you have any questions about the status of HMII3, the restoration phase or concerns regarding property damages including the repair of sprinklers, mailboxes or driveways, please contact Adams Consulting Group.
